TEAM MEMBERS

PROJECT DESCRIPTION

Hotel Del Luna Management

This project is a hotel management project. There are six main modules which are Reservation, Room, Employee, Billing, Guest and the Hotel itself and each member is responsible for at least one module. The main module which is the Hotel module has its own ID and other details including its name, address, phone number, email and star rating.

Our target user will be the hotel management staffs.

HARDWARE & SOFTWARE REQUIREMENTS

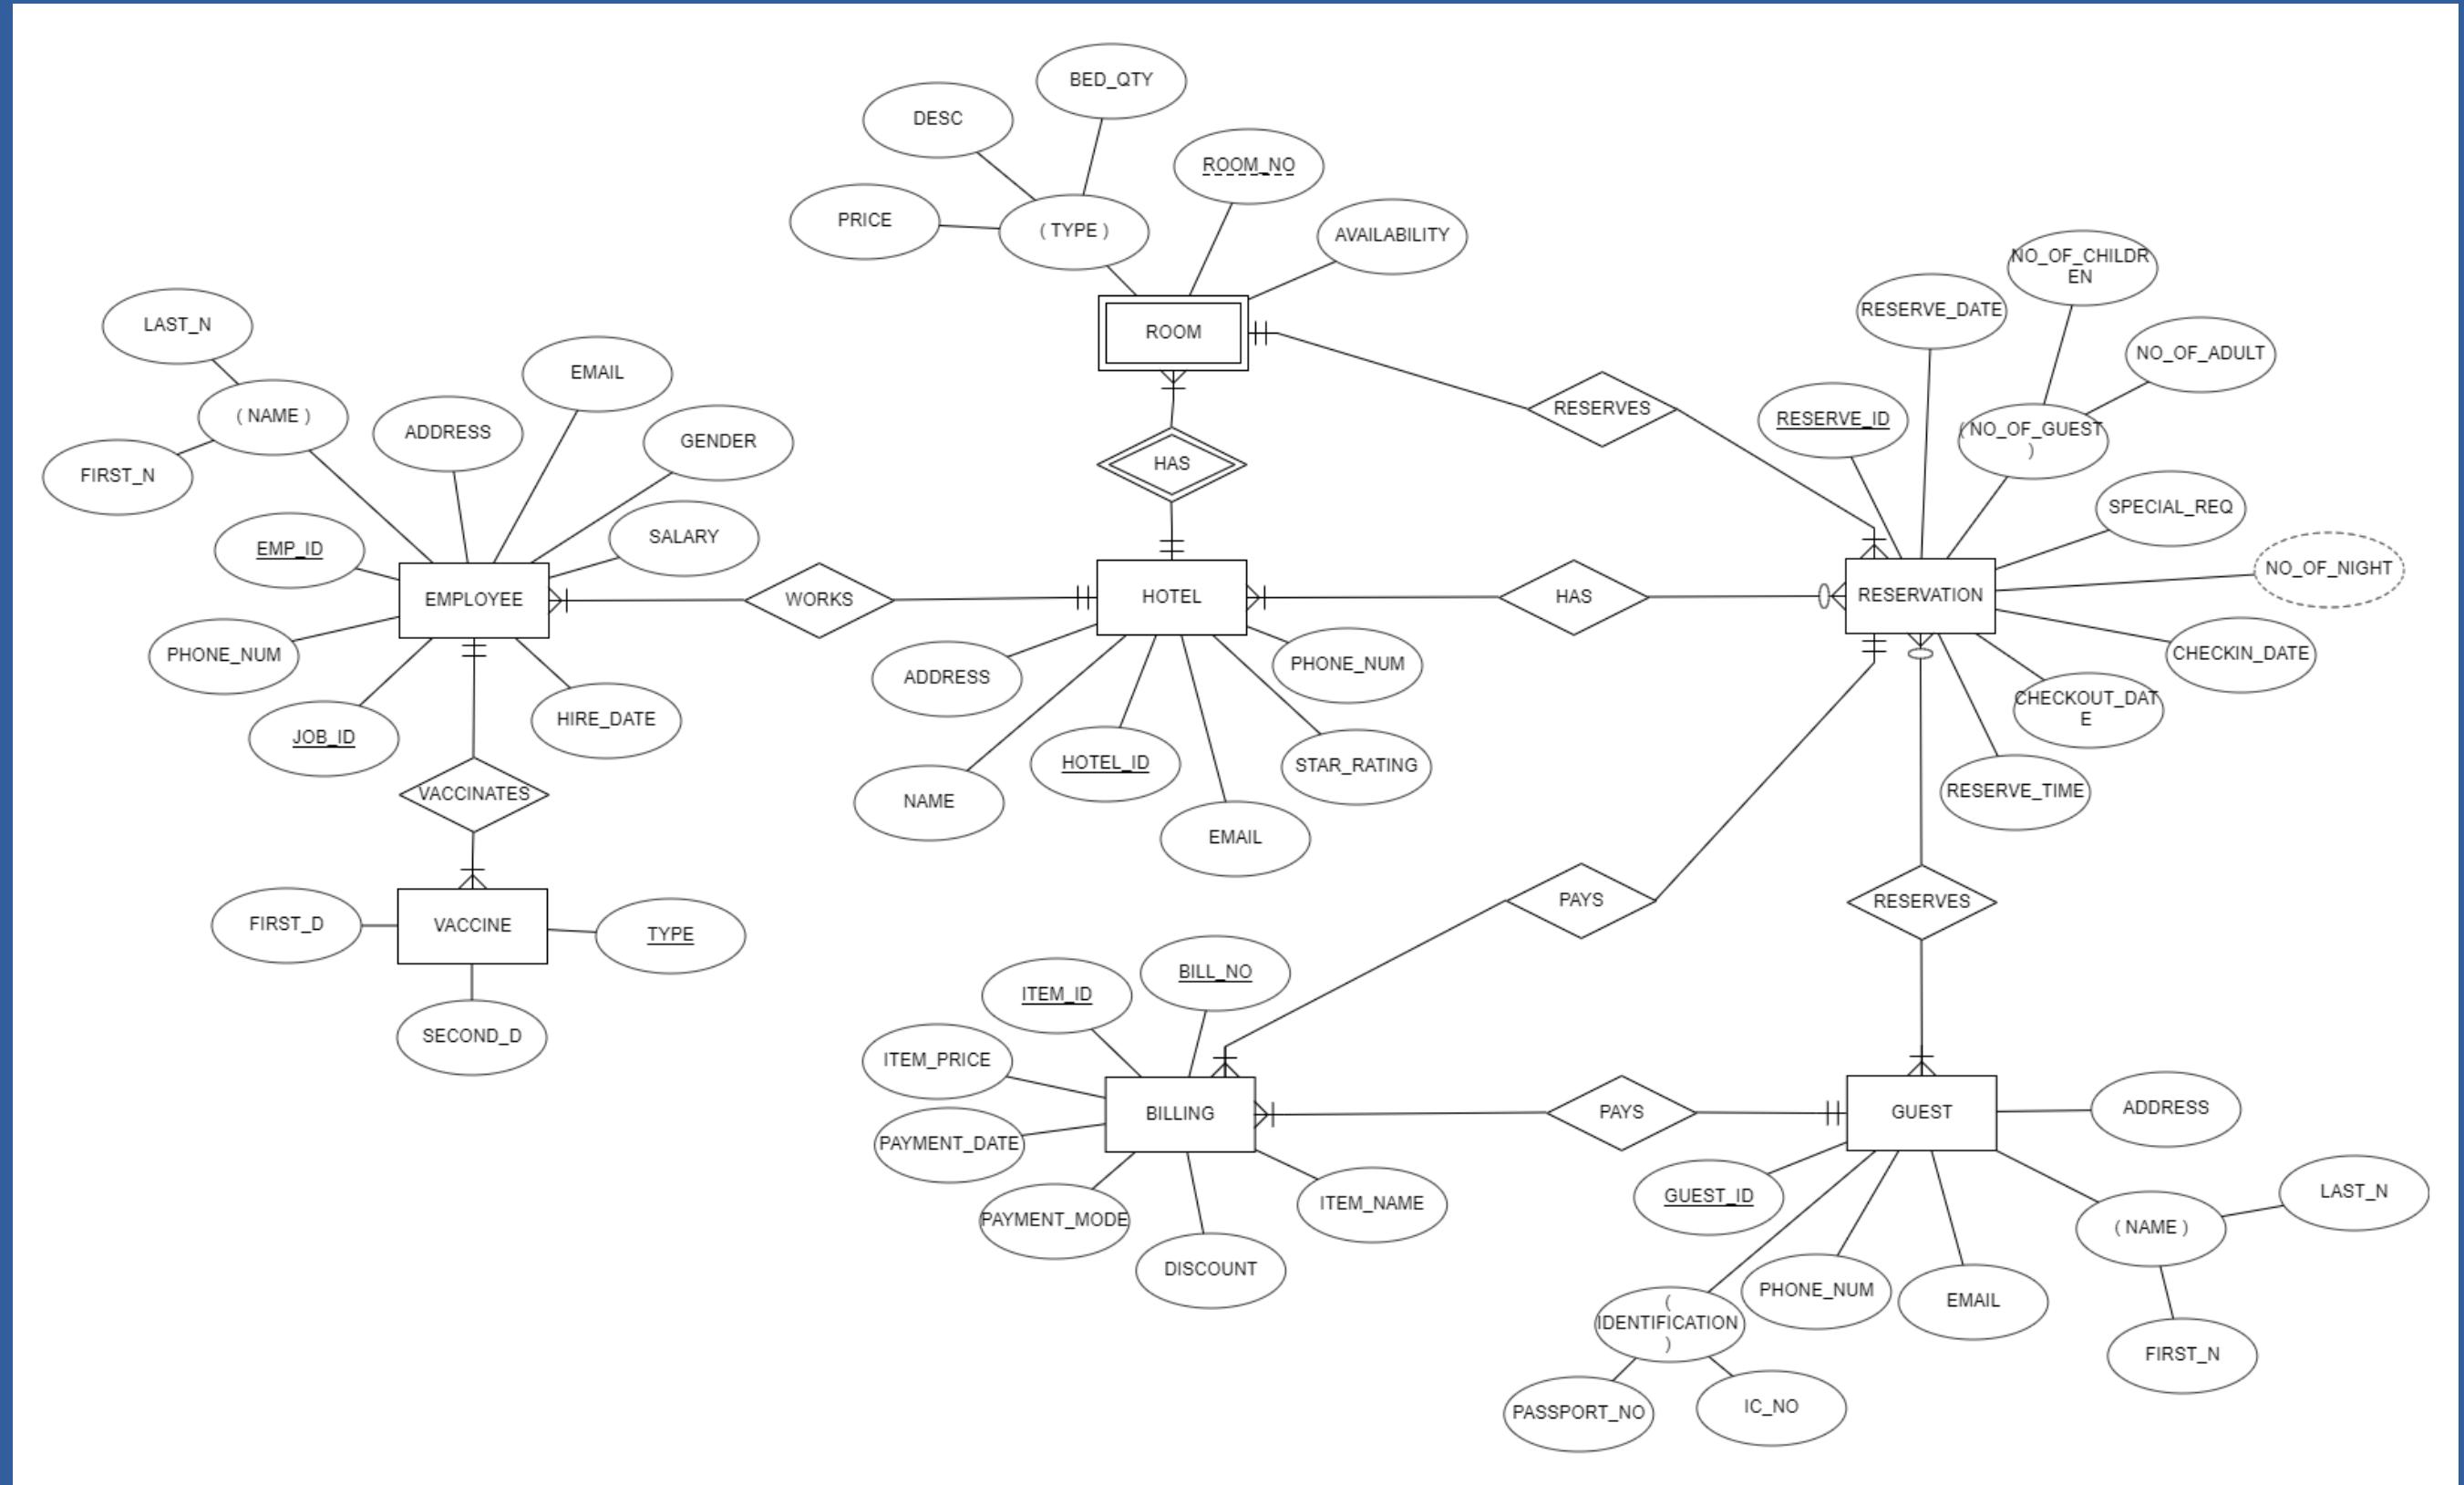

HARDWARE

- LAPTOP
- MONITOR
- KEYBOARD

SOFTWARE

- ECLIPSE IDE FOR ENTERPRISE JAVA AND WEB DEVELOPERS
- ORACLE SQL DEVELOPER
- ADOBE PHOTOSHOP CC 2018
- MICROSOFT POWERPOINT

ENTITY RELATIONSHIP DIAGRAM (ERD)

NORMALIZATION

COURSE/PROJECT REFLECTION

Hotel Del Luna Management

COURSE/PROJECT REFLECTION

[NUR AMIRAH FATIHAH BINTI NORAZMI]

First, it was a good memory to experience and learn about database applications. Also it is a blessing to meet and learn from a wonderful lecturer and friends throughout this semester. In this project I experienced various things such as communication is a primary key in a teamwork. Because it can lead to trust, harmonization and understanding. All are important to complete a task in a team. In the end, we managed to complete all of the part in the project together even though we faced some difficulties. So, in general I am grateful and delighted after completing all the tasks in this project and course.

A big thanks from me to my lecturer and my team members. (>_<)☺

COURSE/PROJECT REFLECTION

*[NUR KHAIRINA BATRISYIA BINTI MOHD
NAZRI]*

This course has taught me how important database is in an organisation. To top it off, this project also proves how database is easier to handle even though my group members and I are working from different locations. It was a bit challenging to make sure everything is working right, from the database SQL to the codes in Eclipse. It was a great experience and it has taught me a lot of things regarding database system. I believe I have learned a new skill from this project and course.

Everyone in my group gave excellent teamwork and I could have not asked for better team members. A huge thanks to them for guiding me as well during the process of this project. Thank you too to Dr Mas Rina for teaching us such valuable knowledge regarding database and its applications.

COURSE/PROJECT REFLECTION

[NIK MUHAMMAD ASYRAF BIN NIK ISMAIL]

Everything was new to me because this was a long-term web development project. In my opinion, teamwork was the most important and necessary aspect in such a long project. Fortunately, I had the opportunity to work with fantastic friends who were quite helpful throughout the project. Furthermore, communication was an enormously important component. It was critical to contact and talk with each member of the group as well as the lecturer on a frequent basis. Overall, I am pleased with the outcome of our project and the work we put forward.

COURSE/PROJECT REFLECTION

[NURUL SHAREFA HANEEM BINTI SHAHRI]

Doing this project is so fun to me because I can learn new things on how to develop a web-based database application by doing the coding and so on. I really hope that I can learn more about this course in future. For the teammates, I really love them. They are so supporting and friendly. At first, I thought this project will going to be hard, but because of them, this project becomes more interesting. Everyone is so cooperate to complete this project. They also helped me a lot in making this project. Thanks a million!

Lastly, I just want to say to Dr. Masrina a big thank for teaching us this course. I really enjoyed until the last class. I hope to see you again in future!

THANK YOU!
